PROJECTS

Disability Aid (ISL Gesture Recognition) | PyTorch, FastAPI, React, MediaPipe

July 2025 – Mar 2026

- Built a cross-platform desktop app for real-time Indian Sign Language recognition, engineering a 1154-dimensional pipeline using MediaPipe and training a BiLSTM classifier in PyTorch for sub-100ms inference.
- Architected a full-duplex WebSocket pipeline between frontend and FastAPI backend, with a 5-frame majority-vote smoothing engine to filter false positives; packaged as a standalone Windows installer via PyInstaller and Electron.

Red-Team Toolkit | Python, Selenium, PyQt6, Sockets

Sep 2024 – Jan 2025

- Built a Python desktop GUI to automate web penetration testing, cutting manual assessment time by 60%.
- Implemented network analysis features using raw socket programming and whois lookups to map domain infrastructure during reconnaissance phases.

Flight Delay Prediction System | Python, Scikit-Learn, Flask, Pandas, NumPy

Jun 2025 – Jul 2025

- Developed an end-to-end ML pipeline covering data preprocessing, feature engineering, and model training across Random Forest, Logistic Regression, and XGBoost classifiers.
- Deployed the best-performing model as a Flask web app enabling real-time delay predictions from user inputs.
